* The data in the table above was obtained by filtering Rimini's metadata productions for documents with the filename [REDACTED] that have an update ID in the FILE PAS field. Alternating row highlights have been added to help distinguish the following six update IDs: HCM200705, HCM200496, HCM200640, HCM200193, and HCM200602. For conciseness, the following fields have been omitted from this exhibit: Ending Bates Number, Beginning Attachment Number, Ending Attachment Number, and Document Type.

** Rimini did not produce the following metadata for these documents: Date Sent, Date Received, Date Created, Author, Sender, To, CC, BCC, and Email Subject. Accordingly, these fields have also been omitted from this exhibit.
